

Human Evaluation Form for Factual Consistency

1 Instructions

Read the source document and the corresponding summary. Then, evaluate the summary as a whole based on the questions below.

Guidelines:

- Use only the content from the source document.
- Consider the meaning of the information, not just exact word overlap.
- Base your answers on your overall assessment of the summary.

2 Error Type Definitions

Consider the following definitions when evaluating the summary:

- **Entity Error:** incorrect information about names, dates, numbers, or locations.
- **Predicate Error (Action/Relation):** an action or relation is incorrectly attributed to an entity.
- **Coreference Error:** incorrect or ambiguous use of pronouns or references in the text (e.g., “he” referring to the wrong person).
- **Inference Error:** a conclusion that is not supported by the source document.
- **Other:** an error that does not fit into the categories above.

3 Identification

- Document ID: _____
- Evaluated Model: _____

4 Evaluation

1. Factual consistency of the summary:

- ☐ High
- ☐ Moderate
- ☐ Low

2. Degree of factual support:

- ☐ Mostly supported by the source document
- ☐ Partially supported
- ☐ Poorly supported or not verifiable

3. Predominant error types identified (select all that apply):

- ☐ Entity Error
- ☐ Predicate Error
- ☐ Coreference Error
- ☐ Inference Error
- ☐ Other: _____
- ☐ No relevant errors

Sentences with errors (copy a short excerpt, if applicable): _____

4. Impact of errors on understanding:

- ☐ Significantly compromise understanding
- ☐ Partially compromise understanding
- ☐ Do not compromise understanding

5. Source of evidence in the document:

- ☐ Beginning
- ☐ Middle
- ☐ End
- ☐ Distributed throughout the document

6. Overall Reliability Score:

(On a scale from 1 to 5, how much would you trust this summary without reading the original document?)

- () 1 - Completely unreliable (severe hallucinations)
- () 2 - Low reliability
- () 3 - Reasonable (minor errors)
- () 4 - Reliable (minor omissions, but no false information)
- () 5 - Fully reliable and accurate

Comments:

5 Note

This form was designed to support human evaluation of factual consistency at the summary level, including the identification of error patterns and the analysis of evidence usage within the source document.
